- 1.a. Students know the position of an object can be described by locating it in relation to another object or to the background.
- 1.b. Students know an object's motion can be described by recording the change in position of the object over time.
- 1.c. Students know the way to change how something is moving is by giving it a push or a pull. The size of the change is related to the strength, or the amount of force, of the push or pull.
- 1.d. Students know tools and machines are used to apply pushes and pulls (forces) to make things move.
